Re: The University of Texas at Austin
LEED v4 Reference Guide for Building Design and Construction

To Whom It May Concern:

The University of Texas at Austin Main Campus operates a district energy system delivering electricity and steam from a gas-fired combined heating and power facility and chilled water from chillers in central chilling stations. For compliance with the guidelines defined in the **LEED v4 Reference Guide for Building Design and Construction**, the University of Texas at Austin has prepared supporting documentation relating to the following prerequisites & credits:

- EAp2 – Minimum Energy Performance
- EAp3 – Building Level Energy Metering
- EAp4 – Fundamental Refrigerant Management
- EAc1 - Enhanced Commissioning
- EAc2 – Optimize Energy Performance
- EAc6 – Enhanced Refrigerant Management

These documents are maintained as needed for LEED building projects on campus, and are available for download at:

utilities.utexas.edu/sustainability/leed/leed-v4.html

A handwritten signature in black ink, appearing to read "Juan Ontiveros".

Juan Ontiveros, P.E.
Associate Vice President
Utilities, Energy & Facilities Management
